

Avtech
Systems Limited

Specialists in AV Systems Integration
and Turnkey Projects

Overview

Since its inception in 2001, Avtech Systems Ltd with its focused approach has managed to become East Africa's leading professional Audio and Video systems integrator.

Drawing on a combination of leading partners and highly certified sales and technical specialists, ASL is able to deliver an unmatched level of expertise throughout a diverse range of markets.

Our Story

Avtech Systems Ltd was born out of an ideological desire to provide 'technology with a difference' in the pro AV industry and especially systems integration. We started off as a rental company moving pieces of equipment from one venue to another.

At this time, the AV equipment particularly LCD projectors were expensive and users preferred to hire than buy. Over time, rentals business standardized and sales were more lucrative. Owing to stiff competition and thin margins on sales of single items, the business had to diversify.

We found a niche in AV projects. Whereas, the competition was all about supply of 'boxes of equipment' the main challenge was how to integrate the various devices into a seamlessly functional system. To date, Avtech Systems Ltd remains the much-sought-after AV systems integrator.

And we have not taken it for granted! We live this business of systems integration. Its our forte. We shall keep it.

Our Vision

To exceed our client's expectations by employing unique, proven and highly successful approach to the A/V industry

Our Mission

To provide clients with the highest quality solutions for a complete room and project integration projects, delivering them on time and under budget.

Our Strategy

Our strategy is simple-build relationships, business will follow. This single minded approach allows us to build long term partnerships based on mutual progress and trusts.

We strive to bring the newest pro AV technologies into this market. Forever we will remain focussed on this business!

Our Values

Our values are ingrained in our corporate culture - they set us apart in our thoughts, actions and conduct with our clients.

Reliability

We are in the business of consistency - delivering consistently exceptional service at the right time and place.

Integrity

We believe in a market that thrives on fair competition - refusing any compromise in quality.

Professionalism

Our meticulous adherence to our codes and ethics sets us apart - in what we do and we do it.

Dedication

It is this sincere dedication that gives us pleasure and accomplishment - in what we do.

Excellence

We are what we repeatedly do - excellence then is not an act, but a habit

We work as a chain that ultimately results in world-class customer service and satisfaction.

Awards

We have been continuously recognized as an industry leader by our partners, clients and the business community.

From 2008, we have been ranked among the TOP 100 SME firms in Kenya and in 2012 received 1st Award in ICT category as a leader in this field.

Our CSR

Ultimately organizations are made up of individuals - as individuals we at Avtech Systems Ltd realize our responsibility towards our stakeholders and society at large.

As an organization - we strive to create a positive impact on lives of all those around us especially the youth in slum and rural areas

These awards confirm our commitment to the AV industry.....our CSR programmes ensure that these commitments are passed to next generations.

Clientele

Partners

We don't take our work lightly. Ask the above.

Product Portfolio - Audio Visual Equipment

A must for every Boardroom, Conference, Lecture Theatres, Auditorium etc. From projectors to multiple LCD screen displays, Interactive Monitors and many more, your meeting room should reflect your standing to the public.

Multi-site

Capable of connecting multiple sites and multiple presentations, Christie® Brio enables effortless meeting collaboration, regardless of geographic location.

Straightforward setup

No hardware dongles to buy, break, or lose. You're up and running quickly and ready to share.

Whiteboard sharing

An interactive whiteboard allows any participant to add to or edit a drawing, providing a richer, more collaborative experience.

Life is too short to go unnoticed. And we are not suggesting we are the best.

Product Portfolio - Broadcast Equipment

From simple production studios to ON-AIR Broadcast Studios for both Radio and TV, we deliver world class broadcast facilities for budding artists, media schools, programme producers and broadcasters.

But if someone wants to depict us that way, then of course, we are honoured and delighted. And it happens frequently.

Product Portfolio - Conference Systems

From Video Conference to Tele Presence, enjoy HD real life pictures as if the persons were present. Connect to various sites and show your presentations remotely.

Televic conference systems ensure that language is not a barrier to multi lingual meeting. Express your opinions by digital voting and be heard from the comfort of your chair and select the language you understand. That's it.

Evolve with technology - cut down on your travel expenses.

Product Portfolio - AMX Control Systems

Control virtually everything in your room(s) from a single touch panel or tablet. Avoid several remote controls - introduce AMX technology to control lights, AV, AC, window drapes, door locks....everything in that room can be controlled by AMX.

AMX
whole home control

Select the music you want to hear in each room and control volume from one central location or in each room with local room audio controls.

Turn lights on when you come home at night, turn lights off from your bedside, or set lighting presets for nighttime pathways or the perfect lighting for entertaining.

Adjust your temperature, or set a time program for temperature settings to automatically change throughout the day, or set vacation temperature levels.

Set the temperature or adjust the heaters, pumps, or jets for relaxing in the spa or for a refreshing swim in the pool.

View IP-based security cameras to keep an eye on the front gate or pool, or check your local weather or traffic before you leave the house.

That's the power of technology!

Product Portfolio - Signal Switching and Distribution

Whatever signal you want to input, switch, distribute, or interface for a simple or complex AV project - we provide the solution. HDBaseT technology is a movement within the AV/IT world where one cable transports/carries power, data, audio, video, control etc in a single cable.

Avtech Systems Ltd is part of this HDBaseT alliance that makes AV/IT integration simple.

No more several runs of cables, just a single cable run for all your signals...including power!

Product Portfolio - Access Control and CCTV Surveillance

IDTECK provides Access Control systems that manage how people access your workplace, staff time and attendance, which staff visited where and at what time.

CCTV surveillance helps monitor and deter crime related activities, provides evidence of happenings and alerts the user of possible intrusion. For both business and public surveillance-our range of products are diverse to meet your needs.

IDTECK

EverFocus®

Guarantee your premises by controlling access and monitoring live events.

Product Portfolio - Safety

Many call it Public Address, BGM/Background Music, but we call it Voice Evaluation Systems. Building occupants safety should come first, reach everybody at a touch of a button and give direction during emergencies or play soft background music.

A must for shopping malls, buildings, workplaces, warehouse/factories, public places, transportation terminals i.e airports, bus parks, railway stations etc.

Ensure you reach all your building's occupants and guide them to safety during emergencies at a touch of a button!

Product Portfolio - Language/ICT Labs

Want to teach/learn foreign languages or manage your ICT Lab the easier way? Ensure that you have total control of each PC, Laptop, Tablet, Smart phone etc in the ICT Lab. Blank all the screens, restrict visits to social sites, disable the keyboards, view a student PC/screen, send your screen image to a student or a group of students, switch off/on all the PCs from the comfort of Teachers PC.

sanako 

Simply put....have total control and attention in your class!
